- Store Administrator & Customer both gets Order Details via Email in both Checkout options.
- Unlimited Categories
- Unlimited Products
- Well documented
- 100% Customizable Shopping Cart

How it Works

One can go the product page & click on product thumbnail the product details will be shown. There is button for **add to cart** for that particular item. If the product with the selected options (e.g. Size, colors) already in the cart, the button automatically change to **update**. Custom quantity can be update from here.

The Store also has facility for search product. By going to sidebar at left, there is input field for search.

If available products are more that the Pagination count set in config_store. Then pagination shows automatically.

To see shopping cart you need click a button placed top right corner, on click it will open shopping cart in modal window. Using shopping cart you can add/update or delete the quantity for particular items. Cart also shows total amount of the cart items including shipping charges.

As configured by the Store Admin you can place order using  or **by Email**. On the successfully placement of order **Store Administrator** as well as **Customer** will get order details via email.
