

Update instructions to update from 2.26 to 2.27

make sure to backup all of your files and your database before updating/replacing
AND don't forget to save at least the \$config->secretKey

to get more information what the changes are please use something like WinMerge <http://winmerge.org> to compare your existing version with the new Version - so you could update "modified by you" files easier.

**Please take care when copying and pasting,
maybe some wrong characters could be inserted
i.e. – instead of -**

1. Config changes *(just the version number update)*

open

```
# config.php
```

and

```
# find
```

```
$config->version = "2.26";
```

```
# replace with
```

```
$config->version = "2.27";
```

2. Direct Upload Error Handling

replace your jqu/index.php and jump to step 3 **or** follow the modification instructions bellow

open

```
# jqu/index.php
```

and

```
# find
```

```
error_reporting(E_ALL | E_STRICT);
```

```
#add below
```

```
//SFS PHP ERROR CHECKS [+]
$numFiles = count($_FILES["files"]["name"]);
//multiple file upload not allowed
if (!$config->multiUpload && $numFiles > 1) {
    exit("Files Count Error: You are only allowed to upload one single file at once!");
}
//maximum number exceeded
elseif ($numFiles > $config->maxMultiFiles) {
    exit("Files Count Error: Only " .
        $config->maxMultiFiles . " files can be uploaded at once.");
}
//file size and extension error checks
$sizeErrorFiles = $extDeniedFiles = array();
for ($i=0;$i<$numFiles;$i++) {
    if ($_FILES["files"]["size"][$i]/1024/1024 > $config->maxFileSize) {
        $sizeErrorFiles[] = $_FILES["files"]["name"][$i];
    }
    //extensions check
    $matches = array();
    preg_match('/\.(.*)$/',$i,$_FILES["files"]["name"][$i],$matches);
    $ext = strtolower($matches[1]);
    //denied extensions
    if ($config->extDenied && in_array($ext, $config->extDenied)) {
        $extDeniedFiles[] = $_FILES["files"]["name"][$i];
    }
    //not allowed extension
    } elseif ($config->extAllowed && !in_array($ext, $config->extAllowed)) {
        $extDeniedFiles[] = $_FILES["files"]["name"][$i];
    }
}
//file size errors found
if ($sizeErrorFiles) {
    exit ("At least one of the files exceeds the maximum allowed filesize of " .
        $config->maxFileSize . " MB! Affected file(s): " . implode(", ", $sizeErrorFiles));
}
if ($extDeniedFiles) {
    exit ("At least one of the files has a not allowed file extension! Affected file(s): " .
        implode(", ", $extDeniedFiles));
}
//SFS PHP ERROR CHECKS [-]
```

3. Please replace the following file (*forgotten instruction in 2.25 - 2.26*)

css/font-awesome.min.css

4. Update process finished

you're done
